

MASTER DIGITAL FORENSICS INVESTIGATION REPORT

Document Control ID: DFIR-REP-001

Compliance Standards: ISO/IEC 27042:2015, NIST SP 800-86, Federal Rules of Evidence (FRE 702 & 901)

Classification: HIGHLY CONFIDENTIAL // PRIVILEGED ATTORNEY WORK PRODUCT

1. ADMINISTRATIVE CASE HEADER

Field Name	Investigative Detail
Laboratory / Agency Case Number:	[INSERT_CASE_NUMBER]
Court / Legal Case Caption:	[INSERT_PLAINTIFF_V_DEFENDANT_OR_CRIMINAL_CAPTION]
Requesting Entity / Retaining Counsel:	[INSERT_CLIENT_NAME_OR_RETAINING_COUNSEL]
Lead Forensic Examiner:	[INSERT_PRIMARY_EXAMINER_NAME], [CREDENTIALS_E.G., EnCE, CCE, GCFA]
Reviewing / Peer Examiner:	[INSERT_PEER_REVIEWER_NAME], [CREDENTIALS]
Date of Report Issuance:	[INSERT_ISSUANCE_DATE]
Investigation Matter / Subject:	[INSERT_INVESTIGATION_TITLE_OR_SUBJECT_NAME]

2. EXECUTIVE SUMMARY & INVESTIGATIVE MANDATE

2.1 Statement of Purpose & Scope

[INSERT_LAB_OR_COMPANY_NAME] was retained by [INSERT_CLIENT_NAME] to perform a comprehensive digital forensic examination of electronic evidence associated with [INSERT_TARGET_USER_OR_SYSTEM]. The mandate was to determine whether unauthorized access, intellectual property staging, external data transfer, or intentional anti-forensic concealment occurred within the timeframe of [INSERT_START_DATE] through [INSERT_END_DATE].

2.2 Core Technical Findings Summary

- **User Authentication & Session Activity:** Forensic artifacts confirm user account [INSERT_USER_ACCOUNT] actively authenticated to the system during the critical incident window.
- **Unauthorized File System Access:** Analysis of shellbags and LNK shortcuts establishes direct user traversal and interaction with proprietary directories located at [INSERT_PROPRIETARY_PATH].

- **Removable Storage & External Mounting:** Registry hives verify that external storage media ([INSERT_USB_MAKE_MODEL], Serial: [INSERT_USB_SERIAL]) was mounted with write access at [INSERT_MOUNT_TIMESTAMP_UTC].
- **Data Staging & Exfiltration:** NTFS \$UsnJrnl and file system logs substantiate that [INSERT_FILE_COUNT] confidential files totaling approximately [INSERT_TOTAL_SIZE_MB] MB were copied to external storage.
- **Anti-Forensic Activity:** Identification of Security Event Log clearing (Event ID 1102) and registry artifact manipulation on [INSERT_LOG_CLEAR_TIMESTAMP_UTC] indicates deliberate evidence destruction.

3. EVIDENCE SUBMITTED & CUSTODIAL INTEGRITY

3.1 Physical Evidence Intake & Master Verification Table

Evidence ID	Item Description (Make / Model)	De-Serial /	Hardware Serial / IMEI	Physical Condition	Source SHA-256 Hash	Verification Match
Item 01	[INSERT_MEDIA_MAKE_MODEL_01]	[INSERT_DE_SERIAL_01]	[INSERT_HW_SERIAL_01]	Sealed	/ [INSERT_SOURCE_SHA256_01]	(VERIFIED)
Item 02	[INSERT_MEDIA_MAKE_MODEL_02]	[INSERT_DE_SERIAL_02]	[INSERT_HW_SERIAL_02]	Sealed	/ [INSERT_SOURCE_SHA256_02]	(VERIFIED)

3.2 Target System Environment Baseline

- **System Hostname:** [INSERT_HOSTNAME]
 - **Operating System & Build:** [INSERT_OS_VERSION_BUILD] (e.g., Windows 11 Enterprise 23H2)
 - **Configured System Time Zone:** [INSERT_TIMEZONE] (Offset: UTC [+/-] [HOURS])
 - **Clock Drift / Skew Assessment:** Verified against NIST atomic clock reference; skew recorded at [INSERT_SKEW_SECONDS] seconds.
-

4. SCIENTIFIC METHODOLOGY & TOOL VALIDATION

All examinations were conducted in accordance with ISO/IEC 27037 standards using forensically sterile media and calibrated hardware write-blockers. Hardware and software forensic tools utilized satisfy the *Daubert / Frye* admissibility standards:

Tool / Suite Name	Version	Developer / Vendor	Primary Analytical Purpose
Magnet AXIOM	[INSERT_VERSION]	Magnet Forensics	Comprehensive artifact parsing, indexing, and carved data recovery.
FTK Imager	[INSERT_VERSION]	Exterro	Forensically sterile bit-stream physical imaging and hash verification.
Eric Zimmerman Tools	[INSERT_VERSION]	Eric Zimmerman	Registry hive parsing (RECmd), Prefetch (PECmd), and \$MFT parsing (MFTECmd).
KAPE	[INSERT_VERSION]	Kroll	Targeted artifact triage collection and raw journal extraction.

5. DETAILED TECHNICAL FINDINGS & ARTIFACT RECONSTRUCTION

5.1 Program Execution & Application Usage

Analysis of Windows Prefetch (C:\Windows\Prefetch*.pf), UserAssist, and Amcache confirms execution of the following utilities during the incident timeframe:

Executable Name	Full File Path	Run Count	First Executed (UTC)	Last Executed (UTC)
[INSERT_EXE_1]	[INSERT_EXE_PATH][INSERT_PATH_SEPARATOR]	[INSERT_COUNT]	[INSERT_TIMESTAMP]	[INSERT_TIMESTAMP]
[INSERT_EXE_2]	[INSERT_EXE_PATH][INSERT_PATH_SEPARATOR]	[INSERT_COUNT]	[INSERT_TIMESTAMP]	[INSERT_TIMESTAMP]

5.2 Folder Directory Traversal & Recent File Access

Parsing of UserClass.dat (Shellbags) and LNK shortcut files demonstrates active user awareness and opening of target assets:

Artifact Type	File / Folder Target	Parent Directory Path	Directory	Timestamp Accessed (UTC)	Access	Forensic Proof / Offset
Shellbag	[INSERT_FOLDER_NAME]	[INSERT_PARENT_PATH]	[INSERT_TIMESTAMP]	[INSERT_TIMESTAMP]	Proves	folder viewing in Explorer
LNK File	[INSERT_TARGET_FILE]	C:\Users\[USER]\Recent	[INSERT_TIMESTAMP]	[INSERT_TIMESTAMP]	Proves	file launch / interaction

5.3 Chronological Incident Timeline Matrix

Timestamp (UTC)	Artifact Source Hive	Event Summary & Technical Interpretation	Evidence Exhibit #
[INSERT_UTC_01]	Security.evtx (Event 4624)	Successful interactive console logon for user [USER]	Exhibit A-1
[INSERT_UTC_02]	SYSTEM\MountedDevices	External USB drive mounted as volume E:\	Exhibit A-2
[INSERT_UTC_03]	NTFS \ \$MFT / \ \$UsnJrnl	File [FILE_NAME] written to external drive E:\	Exhibit A-3
[INSERT_UTC_04]	Security.evtx (Event 1102)	Audit Security Log manually cleared by user	Exhibit A-4

6. EVIDENCE DISPOSITION & EXHIBITS INDEX

Exhibit Identifier	Evidence Description	Format / Storage Location	SHA-256 Hash
Exhibit A	Full Forensic Timeline CSV Export	Encrypted Forensic Vault	[INSERT_SHA256]
Exhibit B	Extracted Registry Hives & Parse Logs	Encrypted Forensic Vault	[INSERT_SHA256]
Exhibit C	Chain of Custody Documentation Suite	Physical Case File	[INSERT_SHA256]

7. EXAMINER ATTESTATION & FORMAL DECLARATION

I declare under penalty of perjury under the laws of the United States of America that the digital forensics examination documented in this report was performed objectively, impartially, and in accordance with accepted scientific forensic methodologies. The conclusions expressed herein represent my professional opinions held to a reasonable degree of scientific and forensic certainty.
